4 January 1964

Dear Art:

The attached cost quote gives cost breakdowns for:

- A. The inclusion of subcontract field engineering support during the test phase of the Feasibility Hardware project.
- B. A change in scope of the Feasibility Hardware to incorporate circuitry providing independence of scintillation.

These items are proposed additions to subcontract TMP-1. Their	
addition would increase the estimated cost of this subcontract from	
and the fixed fee from	
and would increase the total cost of our prime contract from	25X1A
to and the fixed fee from	25X1A
<u> </u>	/

25X1A 25X1A

25X1A

Thank you very much for considering this proposal.

Best regards,
